

## KIS Stubby Model 20

**PURPOSE:** To provide on-line status information on bank products and services. Customers use this kiosk to find info on their account, get info on services and bank products offered. It also does on-line banking transactions.

**COMPONENTS:** 15" interactive touch screen monitor, top 17" advertising monitor, speakers, very color laser printer, Thermal 112mm printer, credit card reader and PC with dual video card. All kiosks delivered on time and under budget.

**BENEFITS:** Kiosk allows customers to avoid lines and receive on-line data rapidly, even if they do not have computers at home.

### KIS – Internet Terminal
