

TELLERSAFE Ntegra

Uncompromised Security

The optimisation of cash management calls for specialist experience, resources and truly innovative technology. Across the world, Talaris' cash management solutions are trusted by thousands of organisations to ensure their cash is managed securely and efficiently whilst delivering the ultimate in productivity.

Talaris have in excess of 250 patents granted across 26 countries and are world experts in optimal cash handling solutions. 2,300 Talaris professionals, including over 1,000 service and support staff and 130 business partners cover over 60 countries delivering these solutions - wherever money moves.

The TELLERSAFE Ntegra is intended for bulk deposits up to 10,000 notes per CIT collection.

The TELLERSAFE Ntegra is designed for secure back office cash handling and has the advantage of being integrated with the Talaris Ntegra currency counter for fast secure and very accurate note counting. This enables the user to quickly and effectively deposit large amounts of mixed notes into the SABS category 3, 4 or 5 safe with fill capacities of up to 10,000 notes in tamper evident disposable bags. This smart safe offers a unique specification as it is fitted with a 200 note escrow and a 600 VA UPS to help avoid potential issues that may arise through user error or unforeseen power outages.

User security is ensured using the Pin Keypad or the optional biometric electronic key. Up to 86 unique operators with their own individual identification numbers can utilise this device with the provision to enable 10 supervisors to monitor multiple accounts. The safe is also fitted with multiple electronic locks and anti tampering devices which ensures full security for the cash deposits in the machine.

Transactional data is printed on a thermal receipt for audit and CIT collection purposes.

With the integrated management information software running, it provides the ability to print numerous types and styles of reports and can also be used to connect in a live environment directly to a CIT or bank where each deposit transaction can be reconciled and credited immediately.
